Subject: FW: Arkema Project Area - Draft FCR-17
Attachments: [ATT00001.txt](#)
[FCR-17_Vibracore Step-Out Cores_2022-03-30.pdf](#)

Hi Madi,

Per FCR-17, step-out cores were collected at SC-52-O, SC-56-O, SC-60-O, SC-64-O, SC-67-O, and SC-70-O. We have received preliminary chlorobenzene data from some of the cores and there are remediation threshold exceedances for chlorobenzene at stations SC-56-O, SC-60-O, and SC-64-O. Additional 150 ft step-outs from these three borings are warranted.

LSS proposes an additional row of step-outs 150 ft from these three stations. Please let us know if it is ok to proceed with the additional step-out borings.

Please let me or Mike know if you have any questions about this request. Thanks!

[CAUTION: External email. Think before you click links or open attachments.]

Hi Eron,

Please see attached approved FCR-17. Also, please consider collecting an additional step out sample to the east of SC-70 and to the north of SC-52 to adequately delineate chlorobenzene contamination in these directions. This would allow for greater certainty during interpolation of SMAs in these areas.

Thank you,
Madi

Hi Madi,

Attached for your review is the draft FCR for the step-out cores in the navigation channel to delineate chlorobenzene.

Please let me know if you have any questions or comments. Thanks!
